

Course Closure Policy

During inclement weather or abnormal ground conditions the Links Department will modify golf course set-up, restrict cart access or close the course as required for the short-term and long-term protection of turf health:

- Frost or snow – course will be closed.
- Frozen green – Defined as unable to change pin location on putting surface, including practice facilities: green will be closed, temporary green provided if ground conditions permit.
- Standing water on green – green will be closed, temporary green provided if ground conditions permit.
- Green with documented turf health issues – Green will be closed when putting surface is measured at equal to or greater than 0.400 inches of penetration using Field Scout True Firm tool, temporary green provided if ground conditions permit.
- Abnormal ground conditions, saturated turf or standing water on fairways – defined as ground conditions resulting in turf damage caused by cart traffic: medical carts only or no carts allowed.
